

what do you see when
you look at a feather?

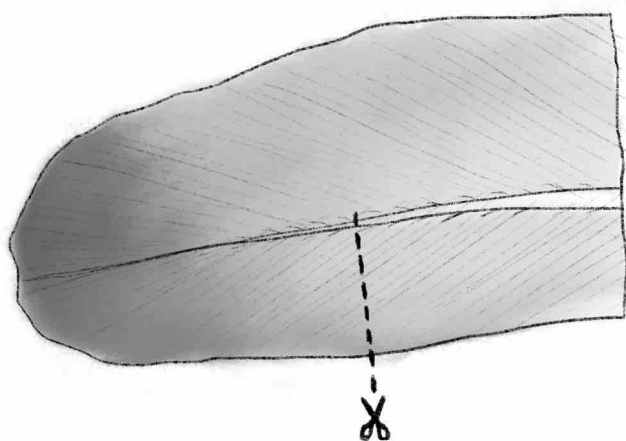

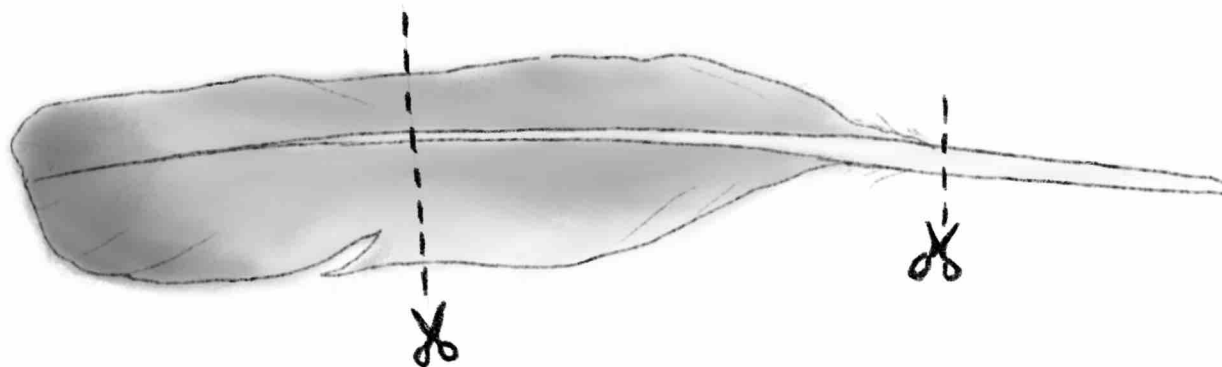

[THE SCIENTIFIC-MATERIALIST APPROACH]

OR

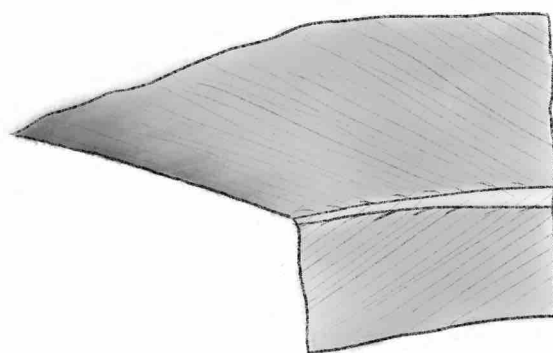

{ the brushcentric singleton state of mind }

AT ANY RATE, CHOP OFF THE CALAMUS
AND SNIP THE TOP HALF OFF...

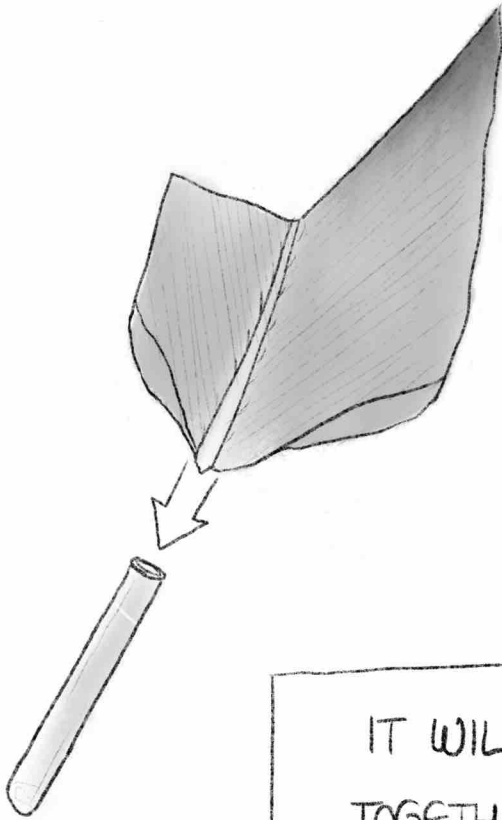

CUT THE TOP
ALONG THE
DOTTED LINE
OVER THE RACHIS

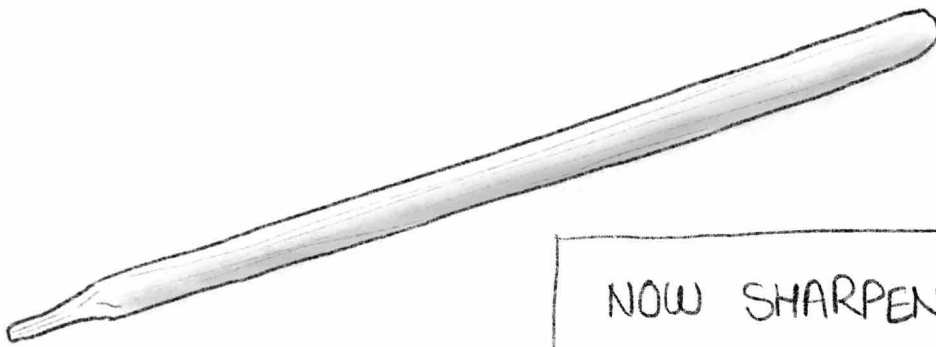

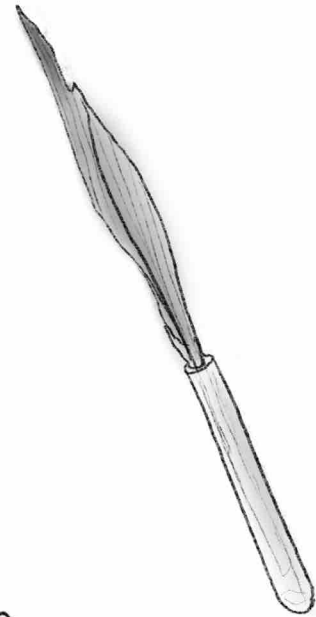

THE FEATHER
WILL TEAR
ALONG THE BARB
TO CREATE A POINT

INSERT THE
PREPARED TOP-HALF
INTO THE CALAMUS

IT WILL CURL
TOGETHER AND
FIT IN SNUGLY

NOW SHARPEN A STICK AND
INSERT INTO THE CALAMUS

TA-DAA, A PAINTBRUSH
